Milan, 23rd OCTOBER 2025 - Final preparations are being made for the next instalment of [RedCabin's](#) Rail Interior Innovation Summit, which this time will be hosted by OMER in Palermo from the 28-30 October.

Producers of railway interior components for high-speed, regional, and metro trains, OMER will welcome the great and the good of interior innovation for a three-day summit that will conclude with a tour of the company's Palermo-based facility.

Attended by decision-makers in train interiors - from manufacturers, operators, designers, suppliers, associations and government agencies - the three-day summit aims to enhance collaboration by sharing ideas across a huge number of events.

Attendees can expect panel discussions, networking sessions, and roundtables scheduled across the three days, all featuring major names from across the industry, including Deutsche Bahn, SNCF, Alstom and Transport for London, to name a few.

Events over the first two days of the summit will offer guests the chance to hear from speakers about a range of topics and trends from within the industry, including sustainability, digitalisation, accessibility, onboard safety, and premium passenger experiences. They will also see how the industry is tackling these issues and what the future of train interiors may look like.

On day three of the event, the delegates will visit OMER's Palermo facility, with the opportunity to see the behind-the-scenes operation of the factory, OMER's vision for the future and to see the cutting-edge manufacturing processes that are shaping the future of rail travel.

Speaking ahead of the upcoming summit, **Giuseppe Russello, President & CEO of OMER, said:** *"Hosting the Railway Interior Innovation Summit Europe by RedCabin fills us with pride and represents an important recognition of our company as a key player in the international railway landscape. Welcoming professionals, designers and innovators from all over the world means creating a space for dialogue and inspiration about the future of rail transport. At OMER, we have always believed that collaboration and innovation are the driving forces shaping the future of rail. This summit offers an extraordinary opportunity to exchange ideas, celebrate technological excellence and explore new solutions to make train interiors increasingly sustainable, comfortable and centred on the passenger experience. It is with great pleasure that we open our doors to such a prestigious event which, over these three days, will undoubtedly offer valuable opportunities for discussion and collaboration - paving the way for the continued development of the entire rail industry".*

The Railway Interior Innovation Summit Europe 2025 is sponsored by: SEKISUI KYDEX, Inperial, PriestmanGoode, 3M, FISA SRL, Testori Textiles, EAO, Clerprem, Wabtec Corporation, DTI Products, Leonica, Herbert Kneitz GMBH, E. Schoepf GmbH and Metzco.

Monica Wick, founder and CEO of RedCabin, added: *"We're thrilled to bring the Railway Interior Innovation Summit to Italy for the first time, and with OMER S.p.A, a company that exemplifies the sort*

of innovation that is required for driving our industry forward. We look forward to welcoming delegates from across the globe to Palermo for what promises to be an unforgettable experience”.

About RedCabin

Founded in 2017, RedCabin is home to the global rail summit series, #RedCabinLIVE, which is focused on using collaboration and interactivity to develop new products, partnerships and processes which tackle the biggest challenges in rail and improve the onboard experience. Attended by senior executives from the world's major train organisations – including operators, design houses and manufacturers – RedCabin is the birthplace of many innovative projects and ideas which are reshaping how we travel. For more information on RedCabin and its vision, please visit: <https://redcabin.de/>

About OMER

OMER S.p.A., founded in Palermo in 1990 as a manufacturer of components for road vehicles, in 1993 began operating in the sector of components and interior furnishings for railway vehicles. Today OMER is an important international operator in the design and production of railway components with a high engineering, design and innovative content, intended for the preparation of high-speed, regional and underground trains. The Company is positioned as a partner of the manufacturers of railway trains, which receive their orders from railway transport operators. The Group is recognized by the main manufacturers of rolling stock and is specialized in the design and production of railway interiors, i.e. internal coatings intended for all areas of the vehicle, of cabins for sanitary modules (so-called toilet module cabins), as well as of the external components of the carriage, such as fairings and doors. The Group's commitment is also made clear by an ESG (Environmental, Social, Governance) profile. The Issuer's products are in fact intended for a sector which cares for the environmental impact such as the railway sector. In this regard, the prevalent use of aluminium inside the trains is oriented towards high recyclability. For more information visit our website: www.omerspa.com
